Baarn, Netherlands

PROFESSIONAL SUMMARY

I build the rooms where learning happens. Five innovation labs built across universities and research institutions. Simulations designed that make complex systems tangible. Workshops run where participants who never touched AI left having built something real. I hold rooms with the same muscle I developed growing up behind a market stall on the Albert Cuyp: crowd-reading, rapid rapport, keeping energy alive through four hours of hands-on work.

For Goodera's AI Labs: I bring proven AI facilitation experience (Flowise, OpenWebUI, n8n, Claude, prompt engineering), a self-hosted AI sandbox used by Windesheim students and researchers, and a track record of normalising confusion for first-time builders. My Beer Game demonstrator teaches supply chain dynamics through doing, not watching. Same design philosophy, different content. I am based in Baarn, 45 minutes from Amsterdam, available freelance.

CORE COMPETENCIES

AI Facilitation

Workshop Design and Delivery

Prompt Engineering (Claude)

Hands-on AI Learning

Simulation Design

Experiential Learning

Audience Dynamics and Pacing

Conscious Competence Method

Nonprofit Technology

Workflow Automation (n8n)

Innovation Lab Building

Participant Engagement

Real-time Adaptation

One-on-one Technical Coaching

Agile Facilitation (15+ years)

WORK EXPERIENCE

Windesheim University of Applied Sciences

Jan 2020 - Present

Project Manager, Supply Chain Finance Lectoraat - Zwolle, Netherlands

- Beer Game Demonstrator:** Rebuilt the classic logistics simulation with a modern interface and live facilitation format. Runs with groups of 20-30 students; designed to make the bullwhip effect tangible through direct experience, not explanation. Used as a teaching tool in active university courses. demonstrator.valuechainhackers.xyz
- AI Lab Deployment (self-funded):** Set up and maintained a hands-on AI sandbox using Flowise, OpenWebUI, n8n, and Supabase on self-managed Linux infrastructure. Students and researchers experiment with live AI tools, prompt engineering, and workflow automation. Used Claude and open-source LLMs for applied research.
- Spark! Living Lab:** Founded and ran an innovation lab focused on blockchain simulations and agile supply chain education. Designed the learning environment from scratch, ran student-led experiments, and delivered the BlockBeer simulation game. sparklivinglab.nl
- COVID-19 Mega Project:** Merged eight university courses into one interdisciplinary simulation exploring pandemic supply chain disruption. Facilitated cross-department collaboration across 200+ students.
- KnopenKoning:** Designed and prototyped a decision-making simulation tool for complex trade-off analysis. Combines game design with systems thinking for non-technical audiences.

Aeres Hogeschool Dronten

2021 - 2022

Lab Manager - Dronten, Netherlands

- Designed and ran an innovation lab combining agile educational design with project-based learning. Introduced simulation-based curriculum and supported student-led projects that evolved into independent startups.
- Agile Course Integration:** Merged eight separate courses into one sprint-based innovation track using SafeScrum. Introduced this change across the school in under two months.
- Veles Farming:** Recognised a student concept with potential, moved it to the lab for prototyping, and became seed investor. Now an operating agri-tech startup in Slovakia with €2M in funding. velesfarming.com

ROC Midden Nederland

2018 - 2020

Freelance Educator, Agile Learning and Digital Projects - Utrecht, Netherlands

- **Gamified Roleplaying Modules:** Created immersive role-playing environments where students acted as developers, CEOs, or clients. Built through simulation; normalised confusion as part of the learning design. Used Conscious Competence as the pedagogical backbone.
- **Agile Learning System:** Designed a classroom format mimicking real startup environments with collaborative sprints and classroom economy.
- Facilitated participant engagement across 4-hour sessions, adapting pacing and providing one-on-one coaching to participants who got stuck.

Social Chicken (Freelance)

2016 - 2022

Senior Project Manager and Educator - Amsterdam, Netherlands

- **Inblock.io:** Delivered blockchain training and proof-of-concept workshops for business audiences. Translated technical complexity into accessible, hands-on learning experiences.
- **2bSMART:** Delivered blockchain technology training using interactive logistics simulations for supply chain professionals across Benelux. Collaborated on design of the Smartys simulation platform. 2bsmart.cz
- Built and delivered creative coding workshops and digital literacy programs for youth and community groups.

Hogeschool Inholland

2021 - 2022

Guest Lecturer and Course Designer - Netherlands

- **Blockchain Minor: Build Your Own Crypto:** Designed and delivered a full course on building a cryptocurrency from scratch with a specialisation in tokenomics. Curriculum still in active use.
- **Dashboarding and Analysis:** Designed and delivered an applied course in data dashboarding and business analysis. Still running independently.

The Fork (now Open Food Chain)

2018 - 2020

Head Trainer and Innovator - Amsterdam, Netherlands

- Led professional training programs in digital food technology and innovation. Designed a physical learning object for blockchain training that made abstract concepts tangible and teachable.
- Hired and mentored students to co-develop production software and prototypes.

WDS Global

2008 - 2010

Technical Support Engineer (3rd Line) and Trainer - Poole, England

- Cleared a backlog of 10,000+ customer emails by redesigning templates and workflows. Proposed and led the creation of tutorial videos later adopted globally by HTC as an innovation in customer education.
- Trained retail staff at Tesco Scotland on smartphone use and sales. Direct audience facilitation at scale.

V.O.F. Verhoef, Albert Cuyp Market

2004 - 2018

General Manager - Amsterdam, Netherlands

- Grew up working the family stall from age 15. Served hundreds of customers daily. Trained crowd-reading, rapid rapport, and high-energy delivery through thousands of repetitions before entering professional life. This is where the room-holding skill was built.

SELECTED PROJECTS

Beer Game Demonstrator Live simulation

Rebuilt classic logistics simulation with modern interface. Participants learn the bullwhip effect by playing through it, not reading about it. Used in active university teaching. Blockchain vs. non-blockchain comparison built in.
demonstrator.valuechainhackers.xyz

Value Chain Hackers AI lab

Cross-European initiative using AI-powered traceability and compliance tools for supply chains. Built AI-based mapping tools for CSRD, CSDDD, and EUDR compliance. Self-funded early tooling and deployment stack.
valuechainhackers.xyz

Spark! Living Lab Innovation lab

Windesheim innovation lab for blockchain simulations and agile supply chain education. Founded and ran from scratch. Delivered BlockBeer game and hosted student-led experiments.

2bSMART Simulation Platform Training delivery

Delivered blockchain training using interactive logistics simulations for supply chain professionals across Benelux. Collaborated on design of the Smartys simulation platform.
2bsmart.cz

Veles Farming Impact startup

Student concept turned operating agri-tech startup in Slovakia. Recognised early, moved to lab for prototyping, became seed investor. Now running with €2M in funding.
velesfarming.com

EDUCATION

Bachelor of Business Administration, Business IT & Management - Hogeschool van Amsterdam 2010 - 2014
Grade 8.7. Thesis: simulation-based learning and training methodology at Kongsberg Defence.

CERTIFICATIONS

- Scrum Master
- Professional Scrum Product Owner I (PSPO I)
- Train the Trainer (Blockchain) blockchainworkspace
- Data Analysis and Visualization (R, Python)
- ESG and Sustainable Supply Chains
- Prince2, ITIL

SKILLS

AI Tools: Claude (prompt engineering), Flowise, OpenWebUI, n8n (workflow automation), Supabase, self-hosted LLM stacks
Facilitation: Workshop design, simulation-based learning, experiential learning, game-based learning, Conscious Competence method, audience dynamics, real-time pacing
Agile: Scrum, SafeScrum, Kanban, sprint facilitation (15+ years) **Languages:** Dutch (native), English (near-native), German (conversational)
