

# Evaluation: INNOVATORS - Ontwikkelaar Digitale Vaardigheden & AI

**Date:** 2026-06-06 **URL:** <https://onderwijsinnovators.nl/vacatures/ontwikkelaar-lesmateriaal-digitale-vaardigheden-en-ai/> **Archetype:** Learning Experience Designer **Score:** 3.2/5 **Legitimacy:** High Confidence **PDF:** pending

## A) ROLE SUMMARY

| FIELD     | VALUE                                                                                                                                                  |
|-----------|--------------------------------------------------------------------------------------------------------------------------------------------------------|
| Archetype | Educational content developer                                                                                                                          |
| Domain    | EdTech / educational publishing                                                                                                                        |
| Function  | Develop + create AI learning materials                                                                                                                 |
| Seniority | Senior developer (extensive experience required)                                                                                                       |
| Remote    | Hybrid - Bodegraven (with remote flexibility)                                                                                                          |
| Team size | Small team of developers                                                                                                                               |
| TL;DR     | Create AI learning materials for the DIGIT digital skills method (mbo level) - translate AI applications and trends into practical educational content |

**Hours/Comp:** Flexible ("uren in overleg"); freelance or employment; salary not specified **Apply via:** [j.huybers@instruct.nl](mailto:j.huybers@instruct.nl) (Josée Huybers) **Start:** Not specified

INSTRUCT is an educational publisher that has developed teaching methods for digital skills for 35+ years. Three organizations (DO-IT, Vodix, INSTRUCT) form INNOVATORS together.

## B) MATCH WITH CV

| JD REQUIREMENT                                         | CV EVIDENCE                                                                                                                            | STRENGTH                                                    |
|--------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------|-------------------------------------------------------------|
| AI expertise, broad digital skills                     | AI stack deployment (Flowise, OpenWebUI, n8n, Supabase); blockchain; Docker; CI/CD                                                     | Very Strong                                                 |
| Educational materials development (extensive exp req)  | Beer Game simulation design; Aeres curriculum design; Inholland Blockchain Minor; KONGSBERG thesis as applied learning design research | Moderate - systems/curricula design, not content authorship |
| Translate AI trends into practical educational content | AI onboarding for students and researchers at Windesheim                                                                               | Moderate                                                    |
| HBO/WO thinking level                                  | HvA Bachelor 8.7                                                                                                                       | Met                                                         |
| Creative, entrepreneurial, meticulous                  | Confirmed across multiple roles                                                                                                        | Strong                                                      |
| Excellent Dutch                                        | Native                                                                                                                                 | Met                                                         |

**Gaps:** 1. **Content authorship vs. system design** - Christiaan designs learning systems (curricula, simulations, programs). INSTRUCT needs someone who writes educational text and exercises at publication quality. Different skill. 2. **Educational publishing sector** - No experience in textbook/method publishing. Specific workflows (editorial cycles, curriculum standards alignment) are unknown. 3. **MBO sector specificity** - Some MBO teaching experience (ROC) but DIGIT is a product for the market, not a custom lab project. 4. **Bodegraven location** - 50km from Baarn, workable if hybrid.

**Score rationale:** Strong AI knowledge, solid education background, but the specific skill gap (content authorship vs. systems design) makes this a stretch. Freelance model makes it worth a quick application.

---

#### G) POSTING LEGITIMACY

---

**Assessment: High Confidence** - Active on INNOVATORS site.

---

#### MACHINE SUMMARY

---

```
num: 126
company: INNOVATORS (INSTRUCT)
role: Ontwikkelaar Digitale Vaardigheden & AI
score: 3.2
status: Evaluated
date: 2026-06-06
url: https://onderwijsinnovators.nl/vacatures/ontwikkelaar-lesmateriaal-digitale-vaardigheden-en-ai
legitimacy: High Confidence
urgency: No deadline
comp_monthly: "not specified, freelance or employment"
location: Bodegraven (hybrid, ~50km from Baarn)
archetypes:
  - Learning Experience Designer
top_gaps:
  - Content authorship vs. system design
  - Educational publishing workflows unknown
go_nogo: "GO as freelance - quick application, low downside, AI expertise is real differentiator"
```
