

# Evaluation: Provincie Utrecht - Implementatiemanager Trambedrijf

**Date:** 2026-06-06 **URL:** <https://werkenbij.provincie-utrecht.nl/vacature-bdo/implementatiemanager-trambedrijf>

**Archetype:** Change Implementation Manager **Score:** 3.3/5 **Legitimacy:** High Confidence **PDF:** pending

## A) ROLE SUMMARY

| FIELD     | VALUE                                                                                                                                                                |
|-----------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Archetype | Change Implementation Manager                                                                                                                                        |
| Domain    | Public sector / mobility / organizational transition                                                                                                                 |
| Function  | Steer + coordinate + unblock                                                                                                                                         |
| Seniority | Medior (HBO level required)                                                                                                                                          |
| Remote    | Hybrid - Nieuwegein                                                                                                                                                  |
| Team size | Cross-functional: ICT, HR, legal, finance                                                                                                                            |
| TL;DR     | Keep the organizational transition toward a new tram subsidiary BV on track - manage interdependencies, resolve bottlenecks, ensure decision-making is well-prepared |

**Hours/Comp:** Not specified hours; €3,792-€5,341/month gross; 6-month fixed term, potential extension **Apply via:** Provincie Utrecht careers portal **Deadline:** June 11, 2026

Provincie Utrecht is establishing a new independent subsidiary (BV) to manage tram infrastructure. This role steers the implementation program: cross-functional alignment, decision preparation, quality control across the transition workstreams.

## B) MATCH WITH CV

| JD REQUIREMENT                                          | CV EVIDENCE                                                                                                                                                                                        | STRENGTH        |
|---------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------|
| Organizational transition management                    | Aeres: 8-course curriculum into 1 new track (institutional transformation); COTIT: operational restructure of startup; Windesheim COVID-19 Megaproject: 8-department coordination                  | Strong          |
| Cross-functional coordination (ICT, HR, legal, finance) | Windesheim: cross-faculty, multi-stakeholder; Social Chicken: IT + business + legal due diligence across 4 startup exits; KONGSBERG: coordinated across client, contractual, and technical domains | Moderate-Strong |
| Steering on progress, bottleneck resolution             | KONGSBERG Jordan: identified dead-switch client fault on Day 3; Azerbaijan: resolved data contract blockade in one day; COVID-19 Megaproject: integrated 8 parallel lines                          | Strong          |
| Public sector context                                   | Windesheim is government-funded; VCH includes overheidspartijen; Defensie applications; KBenP advisory context                                                                                     | Moderate        |

| JD REQUIREMENT       | CV EVIDENCE                                                                                                                                   | STRENGTH        |
|----------------------|-----------------------------------------------------------------------------------------------------------------------------------------------|-----------------|
| HBO education        | HvA Bachelor BIM grade 8.7                                                                                                                    | Met             |
| Decision preparation | COVID-19 Megaproject: produced coherent deliverable for institutional decision-making audience; COTIT: restructured decision-making workflows | Moderate-Strong |

**Gaps:** 1. **Transport/tram sector** - No direct public transport domain experience. Mitigation: role is about organizational change management, not transport expertise. The sector is context, not content. 2. **6-month fixed term** - Short engagement. Christiaan's model is fractional, so this actually fits. But comp at max is €64k annualized, below target as standalone. 3. **Scale of public sector transition** - Creating a new BV from a provincial department is a specific legal/governance context. No explicit prior experience in entity formation.

#### C) LEVEL AND STRATEGY

**Level:** Medior implementation manager. HBO required, complex coordination expected but not senior strategic design.

**Fit:** Good match for content but short-term and below target comp. Works as fractional stack component for a 6-month period.

**Sell:** - Lead with COTIT: brought operational structure to a startup in transition - same function, different scale. - Aeres SafeScrum: managed institutional transformation across departments, faculty, and external stakeholders. - COVID-19 Megaproject: 8 parallel workstreams, single output. That IS this role.

#### D) COMP AND DEMAND

| ITEM              | DATA                                                                                                   |
|-------------------|--------------------------------------------------------------------------------------------------------|
| Offered (max)     | €5,341/month = ~€64k/year                                                                              |
| Offered (min)     | €3,792/month = ~€45.5k/year                                                                            |
| Christiaan target | €65k-€90k/year                                                                                         |
| Verdict           | <b>Below target at top band. Acceptable only as part of fractional stack or short-term engagement.</b> |
| Fixed-term        | 6 months - finite engagement with clear start/end                                                      |

#### E) CUSTOMIZATION PLAN

| # | SECTION            | PROPOSED CHANGE                                                                                                             | WHY                                           |
|---|--------------------|-----------------------------------------------------------------------------------------------------------------------------|-----------------------------------------------|
| 1 | CV Summary         | "Implementatiemanager voor organisatietransities in complexe, multi-stakeholder contexten"                                  | Matches role language                         |
| 2 | Windesheim bullets | Foreground COVID-19 Megaproject (cross-departmental coordination), COTIT operational transition                             | Most relevant to this role                    |
| 3 | COTIT              | Expand: "Bracht operationele helderheid in een startup in transitie: rollen, workflows, besluitvormingsprocessen"           | Direct analogy to tram BV formation           |
| 4 | Cover letter       | Lead with COVID-19 Megaproject as proof of multi-workstream integration; CONGSBERG bottleneck resolution as character proof | Shows sturen op voortgang under real pressure |

#### F) INTERVIEW PLAN (KEY STORIES)

1. **Bottleneck resolution** - KONGSBERG Jordan dead-switch: identified client-side fault, resolved Day 3, project stayed on schedule.
2. **Cross-functional coordination** - COVID-19 Megaproject: 8 departments, 5 faculties, one coherent output.
3. **Organizational transition** - COTIT: startup in operational chaos, brought structure and clarity in 6 months.
4. **Decision preparation** - COVID-19: wrote for decision-maker level, not field level. "Het audience is altijd één niveau hoger dan de onderzoekers denken."

---

#### G) POSTING LEGITIMACY

---

##### Assessment: High Confidence

| SIGNAL              | FINDING                                                                                                                    | WEIGHT   |
|---------------------|----------------------------------------------------------------------------------------------------------------------------|----------|
| Posting freshness   | Active on <a href="https://werkenbij.provincie-utrecht.nl">werkenbij.provincie-utrecht.nl</a> ; deadline June 11 confirmed | Positive |
| Description quality | Specific salary range, contract type, deadline, role context                                                               | Positive |
| Company context     | Province Utrecht is a stable public institution                                                                            | Positive |
